

HiFly

Wireless Keyboard

Enjoy the delight of wireless

Free yourself from the tangled cord

HiFly Wireless Keyboard is one of the best computer input devices in the market today. It combines the convenience of radio frequency wireless and the trackball with two set of mouse keys and scroll wheel.

As no cables connected to the keyboard, you can put it away to save space when you finish using it. HiFly Wireless Keyboard is ergonomically designed allowing for comfortable use on table or lap.

Control up to 50 feet !

HiFly Wireless Keyboard
